slon are from vienna, austria. after starting the band in 2007 they soon released an ep on the german cdr/netlabel 12rec. "antenne" is their first full-length album.

their influences range from post-rock, math-rock and hardcore to experimental music. powerful instrumental rock songs or powerful collages of instrumental rock songs put together carefully: where many postrockbands often tend to let themselves float into monotony, **slon** constantly let their songs shift through various melodic and rhythmic parts; rather than having their music slowly evolve they keep the listener busy to follow the course of events.

2008/2009 saw them touring through Germany, Czech Republic, Austria, Serbia and Croatia. A big european tour will follow in autumn. Slon shared stages with band like Port-Royal, Gregor Samsa, Caspian, Vortex Rex,...

members of **slon** are involved in various other projects and bands, including tupolev, port-royal, primordial undermin and werner kitzmueller.
